

Mississippi State Chapter / North Branch

LEED Core Concepts & Strategies

Presented by the U.S. Green Building Council

This workshop provides essential knowledge of the LEED Rating Systems and sustainable building concepts for those seeking a better understanding of LEED or pursuing GBCI's LEED Green Associate credential. By presenting LEED concepts at the credit category level – across building types and rating systems – and basics on the building certification process, this workshop provides the foundation required for any 300-level LEED education offering. Real project examples help demonstrate and reinforce learning.

LEARNING OBJECTIVES

After completing this course, you will be able to:

- Identify the key components of the LEED Rating System
- Discuss overall LEED Certification process
- Describe the intents and associated concepts of each LEED credit category
- Recognize successful LEED strategies and measurements for achieving credit category goals
- Explain regulations, recognitions and incentives related to each credit category

WHO SHOULD ATTEND?

Any and all industry professionals seeking to use LEED to build green or to provide services to the building industry:

- Design Professionals
- Real Estate Professionals
- Building Owners
- Service Providers
- Product Manufacturers
- Government Officials
- Contractors
- Tenants
- Educators

LEARNING LEVEL

This is a 200-level course. Familiarity with USGBC and LEED is recommended.
